02

What the data tells us about CK & TH in India

Four months of fieldwork across 3 Bengaluru malls and Guwahati — 371 consumers in total

BUSINESS PROBLEM

PVH Arvind needs an empirical read of CK and TH in India — who's buying, why, what they pay, and which competitors are eroding offline footfall as the marketplace channel scales.

OBJECTIVE

Profile the consumer base, benchmark brand perception against direct competitors, and translate findings into product, price, and retail recommendations.

METHODOLOGY

Mixed-method — primary intercept surveys + transactional analysis + competitor audits + marketplace benchmarking.

2.4× / 3.1×

Multi-order buyers spend 2.4× (CK) and 3.1× (TH) what single-order buyers spend — the highest-leverage commercial lever.

2× — 4×

Retail vs marketplace price gap structurally undermines offline footfall and brand premium perception.

Fit gap

India-specific denim and shirt fit is the most consistently cited consumer pain point across both cities, both brands.

40% / 44%

Female CK and TH visits that are gift-motivated — yet zero in-store gifting infrastructure exists.

CK ≠ CKU

Apparel and Underwear serve different consumers, different competitors, different drivers. Two strategies, not one.

03

Why this study, why now

PVH Arvind operates two of India's most recognised premium-to-accessible-luxury brands

THE CONTEXT

Calvin Klein and Tommy Hilfiger operate in India under PVH Arvind Fashion Pvt Ltd — a JV between PVH Corp (USA) and Arvind Fashions Ltd (India). Both occupy the premium-to-accessible-luxury segment, retailing across exclusive brand outlets, department stores, and Myntra, AJIO, and Nykaa Fashion.

THE OPPORTUNITY

India's premium fashion market is ~USD 8.5B and growing 10–12% CAGR. But fast-fashion (Zara, H&M, Uniqlo) is compressing the aspirational ladder, marketplace discounting is fragmenting price perception, and Indian premium (Rare Rabbit, Levi's) is rising. Margin and meaning are both at stake.

USD 8.5B

Indian premium fashion market size

10–12%

Annual CAGR through 2026

4 months

of mixed-method fieldwork (Dec '25 — Apr '26)

04 What Indian premium consumers want — pre-fieldwork

Four converging trends shape the research lens

“Fit, fabric quality, and brand trust are the primary purchase drivers for the 25–40 urban professional.”

— McKinsey & Company, 2021 · validated independently by this study's primary data

01

IN - STORE

Premium buyers want the fitting room, the steam, the consultation — not the swipe.

02

FIT

India-specific denim and formalwear adaptation is no longer a feature request. It's table stakes.

03

LOYALTY

Recognition by name, tier, and history — not just discounts — is the new minimum.

04

PRICE - VALUE

Same-SKU price comparison across retail and online is now reflexive — and unforgiving.

05

What this project set out to do

Five objectives, two cities, two brands, four channels

OBJECTIVES

01

Profile CK and TH consumers across demographic, behavioural, and spend dimensions.

02

Assess brand perception relative to direct competitors via primary survey data.

03

Benchmark offline retail performance against online marketplace behaviour.

04

Map brand positioning using consumer-derived perceptual insights.

05

Recommend strategic improvements in product, pricing, retail, and loyalty.

SCOPE

GEOGRAPHY

Bengaluru (Tier 1) + Guwahati (Tier 3)

BRANDS

Calvin Klein · CKU · Tommy Hilfiger

CHANNELS

04

DOCUMENTATION

Weeks 13–16 · Apr 2026

- Store audits across GHY outlets
- Intercept surveys (n=32 CK + n=31 TH)
- Membership tier mapping
- VM and store experience audit

- Intercept surveys across 3 malls (n=191 CK + n=180 TH)
- Competitor store visits & VM audits
- Pricing & discount benchmarking
- Membership tier analysis

- Marketplace benchmarking — Myntra & AJIO
- Social listening & brand perception mapping
- Collection analysis — THM, THW, TJM, TJJ
- Retail vs marketplace comparison

- Synthesis of fieldwork + secondary findings
- Full project report writing
- Jury presentation prep
- Viva preparation

07

Four frameworks anchor the analysis

Each framework maps directly to a research question

Consumer Behaviour (Black Box)

Kotler & Keller, 2016

How brand stimuli — VM, pricing, product — translate into purchase decisions across income and loyalty tiers.

Brand Equity Framework

Aaker, 1991 · Keller, 1993

Assess CK and TH equity dimensions — awareness, perceived quality, associations, loyalty — through primary data.

Retail Marketing Mix (7Ps)

Booms & Bitner, 1981

Evaluate store performance across Product, Price, Place, Promotion, People, Process, Physical Evidence.

Omni-Channel Retail Theory

Verhoef et al., 2015

Quantify divergence between offline and online — categories, prices, discount expectations — for both brands.

08

Mixed-method design with primary at the core

Five research components, sequenced to triangulate findings

COMPONENT	METHOD	SAMPLE / SCOPE	PERIOD
Guwahati Consumer Survey	Intercept interview	n=32 CK · n=31 TH across White/Silver/Black/Gold tiers	Dec 22 '25 — Jan 4 '26
Bengaluru CK Survey	Intercept + transaction data	n=191 (119M / 72F) across Orion · MOA · Phoenix	Jan 7 — Feb 28 '26
Bengaluru TH Survey	Intercept + transaction data	n=180 (118M / 62F) across same 3 malls	Jan 7 — Feb 28 '26
Competitor Store Audits	Observational audit	Zara · AX · Lacoste · US Polo · Gant · Uniqlo · H&M	Jan — Feb '26
Marketplace Benchmarking	Secondary analysis	Myntra · AJIO · Nykaa Fashion — top 6 categories per brand	Feb — Mar '26

WHY MIXED - METHOD

Quantitative invoice data tells us what people bought; intercept interviews tell us why; competitor audits and marketplace data tell us what's pulling them away. No single source answers all three.

Consumer Survey

Profiling who buys CK and CKU, and why — Bangalore retail

OBJECTIVES OF THIS STUDY

Profile CK & CKU customers, decode buying behavior, segment into spend-based personas, and benchmark against competitors.

191

CUSTOMERS

ASP Ranges from ₹2.4K (UG) to ₹12K (Shirt) -- and T- Shirts + Jeans Carry the Deepest Discount Load

Price sensitivity is category-specific: Polos sell near full price; T-shirts are discount-driven

AVERAGE SELLING PRICE BY CATEGORY

DISCOUNT BEHAVIOR — 51% OF TRANSACTIONS ARE DISCOUNTED

DISCOUNT BAND DISTRIBUTION (N=191) & Total Units Sold = 330

AVERAGE DISCOUNT BY TOP CATEGORY

Insight: T-shirts + Jeans carry 2× the discount load of Polos — these are price-sensitive acquisition SKUs, Polos are margin-holders.

Source: CK sheet ASP and Discount columns · ASP n by category shown; Discount n=135 transactions with values coded.

CK and CKU Attract Opposite Audiences -- Different Gender, Different Price Point, Different Competitors

Treating them as one customer misses the distinction: apparel shops men's premium; innerwear shops women's value

CK APPAREL		CK UNDERWEAR (CKU)	
SAMPLE SIZE	N = 191	N = 22	
GENDER MIX	62% Male / 38% Female	59% Female / 41% Male	
AVG ASP	₹5,998 (BLUE persona)	₹3,496	
DOMINANT CATEGORY	Shirt · UG · T-shirt · Polo	UG · Bralette · Bikini · Bra	
TOP DRIVER	Fabric Comfort (33%)	Quality / Fit (100% coded)	
TOP COMPETITOR	Zara + Tommy Hilfiger (tied, 23)	Victoria's Secret (12) + Zivame	
PRIMARY OCCASION	Personal (84%)	Personal (self-purchase)	

Takeaway: CK and CKU need separate merchandising logic — CK = premium menswear play vs Zara/Tommy; CKU = value-feminine innerwear play vs Victoria's Secret/Zivame.

Source: CK + CKU sheets · CKU sample small (N=22) — treat CKU figures as directional

Zara and Tommy Hilfiger Tie as CK's Top Alternates -- Pulling the Customer in Opposite Directions

Fast-fashion (Zara / H&M / Uniqlo) and aspirational premium (Tommy / Armani / Boss) dominate consideration

Jockey threatens CK's innerwear shelf, not its fashion identity — a category overlap, not a brand competitor.

Source: CK + CKU competitor column, parsed on commas · Top 10 shown

Fast-fashion threat

Zara · H&M · Uniqlo = 48 mentions

Price and variety. Female shoppers: Zara alone cited by 13 women.

Aspirational ladder

Tommy · Armani · Boss · Lacoste = 63 mentions

Brand prestige and style. Male shoppers climb this ladder — CK sits mid-rung.

Innerwear war (separate)

Victoria's Secret · Zivame · Jockey = 19 mentions

Fit and comfort for women; heritage for men. CKU competes here, not apparel.

Why they switch

Style (CK miss) · Price (Zara win) · Fit (Zivame win)

Three discrete switching reasons — each needs its own retention response.

Retail vs Marketplace Performance — Category, Pricing & Discount Insights

Consumer behavior comparison across retail and marketplace, focusing on category, price, and discount dynamics.

CALVIN KLEIN PRICE BUCKET COMPARISON					
		RETAIL		MARKETPLACE	
Rank	Category	Price Bucket	Discount	Price Bucket	Discount
1	Shirt	6000–6999	0–10%	4000–4999	30–40%
2	T-Shirt	3000–3999	20–30%	2000–2999	30–40%
3	Polo	4000–4999	10–20%	3000–3999	30–40%
4	Jeans	9000–9999	10–20%	6000–6999	30–40%
5	UG	2000–2999	10–20%	1000–1999	20–30%
6	Jackets	11000–11599	10–20%	—	—

TOMMY HILFINGER PRICE BUCKET COMPARISON					
		RETAIL		MARKETPLACE	
Rank	Category	Price Bucket	Discount	Price Bucket	Discount
1	Shirt	6000–6999	Full Price	3000–3999	35–40%
2	Polo	2000–2999	40–50%	2000–2999	35–40%
3	T-Shirt	5000–5999	Full Price	1000–1999	35–40%
4	Accessories	4000–4999	20–30%	—	—
5	Pullover	5000–5999	10–20%	3000–3999	40–45%
6	Jeans	7000–7999	Full Price	5000–5999	35–40%

INSIGHT : Shoppers are moving online because marketplace offers the same branded products at 2–4× lower prices with 30–45% discounts — retail simply can’t compete on value.

- Enables **persona segmentation & customer profiling**
- Tracks **basket composition & cross-sell opportunities**
- Supports **competitor benchmarking & performance analysis**
- Features **filterable interface for real-time insights**
- Includes modules like **Desk Readout, Price Frontier & Category Mix**
- Allows **cross-brand comparison across malls & categories**
- Designed for **retail heads & brand managers**
- Focus on **quick decision-making & actionable insights**
- Ensures **data traceability from research to analysis**

What the numbers mean for the business

Linking each empirical signal to a strategic implication

WHAT WE FOUND	WHAT IT MEANS
01 Multi-order buyers spend 2.4× (CK) / 3.1× (TH) more	Cross-sell isn't a soft KPI — it's the single largest revenue lever in both datasets.
02 Retail vs marketplace price gap of 2× — 4×	Offline cannot win on value. The proposition must shift to fit, advice, and exclusivity.
03 Fit cited as #1 issue across both cities	This is product development, not merchandising — it requires India-specific blocks.
04 40–44% of female visits are gift-motivated	An entire commercial channel exists with zero infrastructure designed for it.
05 Zara is the #1 cited competitor for both brands	The threat is from below (price) not above — defend with fabric narrative, not heritage.

The five-line answer

If the jury reads only one slide, this is it

01

VOLUME ENGINE

26–40 working professionals carry 84–86% of demand for both brands. Build for them first.

02

REVENUE LEVER

Multi-order baskets are 2.4–3.1× single-order. Cross-sell is the highest-leverage commercial action.

03

STRUCTURAL RISK

Marketplace prices 2–4× lower than retail are eroding offline footfall. Most urgent intervention.

04

PRODUCT GAP

India-specific fit (denim hip-to-waist, shirt length) — same pain across both cities, both brands.

05

HIDDEN CHANNEL

Female gifting drives 40–44% of female visits. Zero infrastructure built for it. Highest-ROI quick win.

Nine actions, sequenced by impact

Three product, two pricing, three retail, one loyalty

PRODUCT R1 India Fit Programme Two India-optimised denim fits (shorter inseam, adjusted hip-to-waist) for the 25–45 male cohort.	PRODUCT R2 TH Shirt Length Variant India-specific shirt length variant — short-run, zero added production cost, one-season turnaround.	PRODUCT R3 Accessory & Fragrance Zones Both <5% of revenue. Bundle with apparel as gifting proposition during Diwali / NY / Valentine's.
PRODUCT R4 CKU Colour & Design Expansion 3–5 new seasonal colour-blocks; India-specific bra fit variants to halt attrition to Zivame and VS.	PRICING R5 Online-Offline Price Parity Cap marketplace discounts at 20–25% (from current 30–45%); introduce offline-only SKUs.	PRICING R6 Loyalty Tier Price Protection Price-match guarantees for Black/Gold members on key SKUs; removes channel-switch motivation.
RETAIL R7 Gifting Zone Infrastructure "For Him" zones with curated combos, gift wrap above ₹3,000, trained gifting protocols.	RETAIL R8 Cross-Sell Staff Training Train protocol around the data-validated combos — Shirt+Polo, Jeans+T-shirt, Polo+UG.	RETAIL R9 Trial Room Renovation Highest-ROI infra spend — ₹15–25 lakh per store, 6–12 month payback. Direct conversion lift.

What this project produced

Six deliverables backing every claim in this deck

PDF

GHY Consumer Survey & Feedback — CK

44 pp · 32 individual feedback tables, category contribution, improvement areas

PDF

GHY Consumer Survey & Feedback — TH

31 individual TH feedback tables, category charts, improvement areas

XLSX

CK Retail Survey Data — Bengaluru

220 rows — Name, Age, Gender, Persona, Occupation, Mall, Category, ASP, Bill

XLSX

TH Retail Survey Data — Bengaluru

180 rows — same field structure as CK; source for all TH analysis

PPT

Consumer Survey Analysis Deck

26 slides — profiling, persona, multi-order, cross-sell heatmap, retail vs marketplace

DASH

CK & TH Sales Intelligence Dashboards

Interactive Demand · Margin · Persona dashboards across all 3 Bengaluru malls

25

What four months at PVH Arvind taught me

Theory met retail floor — and retail floor won most arguments

SKILLS DEVELOPED

1

Designing intercept survey instruments that get past social desirability bias.

2

Reading invoice data alongside qualitative feedback — neither is true alone.

3

Building filterable Sales Intelligence Dashboards from raw retail workbooks.

4

Pricing benchmarking across Myntra, AJIO, and Nykaa — channel-by-channel.

5

Translating data points into commercial recommendations a retail head can act on.

THEORY → PRACTICE

Aaker's Brand Equity

CK is innerwear heritage + denim; TH is preppy-American + winter — verified by primary data.

7Ps Marketing Mix

Used as the audit lens for VM, staff, process, and physical evidence at all 6 stores.

Verhoef Omni-Channel

Quantified the retail-marketplace price gap for the first time in the PVH India context.

Kotler & Keller Black Box

Mapped how staff prompts, store VM, and discount signage reshape purchase intent.

26

What this study can't claim — and what comes next

Honest framing of sample boundaries and the research roadmap

STUDY LIMITATIONS

SAMPLE SIZE

CKU n=22 is directional — needs an innerwear-specific follow-up survey.

SEASONAL BIAS

Bengaluru fieldwork in Jan–Feb may over-index on winter categories.

GEOGRAPHIC

Tier 1 Bengaluru + Tier 3 Guwahati only; Tier 2 (Pune, Ahmedabad, Jaipur) absent.

ONLINE DATA

Marketplace pricing captured at one point in time (Apr '26).

SELF-REPORT

Driver and price perception responses subject to social desirability bias.

FUTURE RESEARCH SCOPE

01

Longitudinal Tracking

Repeat-purchase tracking for SILVER and BLACK tier customers — measure retention and LTV.

02

Cross-Sell A/B Test

Quantify basket uplift between trained vs untrained staff interactions over 90 days.

03

Online → Offline Attribution

Map what % of marketplace browsers convert in-store and what triggers the switch.

04

Indian Body Measurement Study

n=500+ measurement panel to inform denim and shirt fit development.

05

Tier 2 Expansion

Run intercept surveys in Pune, Hyderabad, Chandigarh — test whether Bengaluru findings hold.

THANK YOU
